Heredia, Costa Rica | +506 7240 9272 | joshuabenagu@gmail.com

Professional Profile

Software Engineering student with hands-on experience in **web development, technical support, and IT security**. Proactive and self-motivated professional with a passion for **programming and problem-solving**. Skilled in Java, SQL, JavaScript, and modern frameworks, as well as relational and NoSQL databases. Experienced in **security systems, IT support, Active Directory, and network administration**. Eager to join teams where I can continue growing professionally while contributing with commitment and creativity.

Professional Experience

SPC Telecentinel

Jr. Specialized Technician | *San José, Costa Rica* | *March 2025 – Present*

- **Support & Systems:**
 - End-user incident response and support **via Service Desk and remote assistance**, ensuring operational continuity.
 - Basic user management in **Azure and Active Directory** (creation, modification, and permission assignment).
 - Performed **laptop and PC maintenance**, including critical **component replacement** and OS optimization.
 - Contributed to **inventory control** for computing equipment and network devices.
 - Preventive maintenance on network devices such as **APs and network printers** to optimize performance.
- **Security & Access Control:**
 - Implemented **video surveillance systems** through installation and configuration of IP and analog cameras (Maxpro).
 - Integrated **access control systems using ProWatch**, including reader installation, electromagnetic door locks, and biometric devices.
 - Configured **NVR/DVR recorders** to ensure continuous system operation.
 - Performed preventive and corrective maintenance on security systems, connection review, and functionality testing.

Instituto Costarricense del Deporte y la Recreación (ICODER)

IT Networks Intern | *San José, Costa Rica* | *October 2022 – December 2022*

- Designed and implemented structured cabling, applying best practices for organization, identification, and labeling to improve network infrastructure.
- Configured network printers and operating systems (Windows 10 & 11), ensuring effective integration with the corporate environment.
- Participated in the installation and commissioning of IP telephony systems.

Education

Universidad Cenfotec

Bachelor's in Software Development Engineering | *San José, Costa Rica* | *In Progress*

Colegio Técnico Profesional San Isidro, Heredia

Technical Diploma in IT Networking and Computers | *February 2020 – July 2022*

Technical Skills

Languages	SQL (Intermediate), C# (Intermediate), Java (Basic), JavaScript (Basic), C++ (Basic)
Web & Frameworks	HTML, CSS (Intermediate), MVC, APIs, MongoDB
Tools & OS	Visual Studio, SQL Server, Git, Windows, Linux Basic, Office Suite, Inventory Management Systems
Infrastructure & Directory	Azure & Active Directory user management, Structured Cabling, CCNA 1 & 2, IT Essentials
Support & Hardware	Remote Support, Service Desk, Laptop & PC Maintenance, Component Replacement, Network Device Maintenance (APs & Printers)
Other	CRM (Basic), IP Telephony

Academic Projects

- **Gym Management System (Software Engineering 2):** Web application built with .NET, SQL, and MVC. Features include automatic routine and meal plan assignment, group class management, a payments module, and role-based access control for clients, trainers, and administrators.
- **Rancho Sacuanjоче Platform** — Full-stack web booking application engineered with Angular and TypeScript. Features an automated front-end reservation workflow for users and a private administrator dashboard integrated with real-time financial metrics and dynamic content management.
- **Hotel Reservation System (CRUD):** Web application for full reservation management (Create, Read, Update, Delete), including room type administration and availability checking.
- **Pura Vida Care – Telemedicine Platform** — Web application engineered for comprehensive elderly care, integrating clinical records management, teleconsultations, and real-time health monitoring pipelines. Deployed health analytics utilizing Artificial Intelligence APIs for proactive diagnostic insights.

Additional Information

Soft Skills

- Effective communication | Teamwork | Problem solving | Self-directed learning | Empathy & adaptability

Languages

- Spanish: Native | English: B1 (Intermediate, in progress)

Certifications

- CCNA 1 & 2 | IT Essentials | Basic Linux | LibreOffice

Other

- Driver's License (B1) | Flexible schedule and own transportation
